Typography

Typography Guidelines

Primary Typeface: Calibri

- **Headings:** Calibri Bold, 20pt
- **Body Text:** Calibri Regular, 12pt

Secondary Typeface: Arial

- Use Arial as the alternative typeface when Calibri is unavailable.
- Recommended for digital platforms, quick readability, and compatibility with web or older systems.

Best Practices for Typography

1. Maintain consistent line spacing (e.g. 1.5 for body text).
2. Avoid mixing too many font sizes within a single section.
3. Ensure proper contrast between text and background for readability.
4. Limit the use of bold or italic styles to prevent clutter.

Extended Fonts for Youth Marketing

As we continue to expand our reach to younger audiences, we've removed font restrictions for marketing and youth-oriented materials.

To capture the attention of today's youth:

- Use vibrant, fun, and noisy fonts
- Embrace bold, expressive typefaces that reflect creativity and energy
- Prioritize visibility and engagement over uniformity when appropriate

Imagery, Photography and Videography

Style

The type of style for images is average brightness, high vibrant, high contrast, average saturation, photo filter(warming filter (85) or cooling filter (80))

Content

Appropriate imagery is mainly people. Appropriate content for videos is mainly people and nature for backdrops.

Do's and Dont's

Do's - When taking pictures or videos, the company logo should be in the backdrop. If not ours, then at least the logo of the certain individual's workplace. The individual's workplace is also appropriate for a background.

Don'ts - Messy background are not to be displayed or be in the picture or video frame, for example, untidy cables and dug out holes in terms of construction. Overall, untidiness of a place is not to be in the frame.

Stationery

There are Microsoft Word Templates (.dotx) for both the company letterhead and watermark in both A4 page layout, landscape and portrait.

Dear Mr. Smith,

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Cras eu tempus odio. Quisque quis faucibus est. Nulla facilisi. Suspendisse vulputate ante non arcu laoreet, et posuere est tristique. Nam vel felis at nunc facilisis molestie quis ultricies est. Aliquam erat volutpat. Nullam faucibus nisi ligula, quis vestibulum tellus aliquam quis.

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Vivamus ac maximus sem. Mauris sed maximus nibh. Sed diam metus, molestie eu lacus et, vehicula convallis nunc. Cras ornare felis sed metus lobortis elementum. Morbi hendrerit sem leo, quis ultricies odio viverra in. Nunc finibus convallis magna at varius. Donec tincidunt luctus auctor. Pellentesque scelerisque ligula at sem.

If ever it happens that the templates are non-existent or something went wrong, when inserting the letterhead and watermark, they should not be stretched, squished or skewed. If it can not be helped, ask for assistance from who can handle it in a delicate way.

Social Media

The brand should appear the same on all social media platforms. It should be a PNG and a full logo. It can differ on the media posted but not the covers.
